SALES GROUPS DETAILS

By: Roxana Rodriguez, Marketing Manager
E-mail: roxana.agelviz@pastechнологies.com

The Fluid Handling Group Group is in charge of the following Product lines: AT Controls, Inc., Leslie Controls, Inc., Jordan Controls, Inc. Precision Instruments, Reotemp Instruments & Triac Controls.

The Fluid Handling Group offers a variety of fluid handling equipment, systems and engineering, maintenance and repair services. Application areas range from pressure regulators, temperature regulators, safety relief valves, control valves, steam traps, strainers, filters, condensate pumps, pressure gauges, thermo wells, remote pressure seals, instrument valves & manifolds.

We take pride on our team of professionals. They have the necessary knowledge and experience to assist you. Call us at 787-752-2370.

 **A-T Controls, Inc.** A-T Controls designs, develops and manufactures valves, actuators and valve control products including [manual ball valves](#) and [automated ball valve packages](#); [actuators](#) for the automation of industrial valves; [positioners](#) for precise modulating control; electrical [solenoid valves](#) for on/off control; [limit switches](#) for end of travel position indication; and [valve control accessories](#) including [gearboxes](#) and [overrides](#), [block and bleed valves](#), [dribble control systems](#), [lock-up valves](#), [flow and speed control](#), [dome indicators](#), [filter/regulators](#) and more.

Jordan Controls designs and manufactures a broad range of rotary, valve, and linear electric and electro-hydraulic actuators for process control and industrial automation. These rugged products are used in the power generation, oil and gas, chemical, utilities, pulp and paper, and process industries.

It has been one hundred years since Canadian born John Leslie advertised his first major product, a steam powered snowplow for railroad locomotives. Leslie's product lines have grown significantly over the last century and now include a wide variety of products to cover almost any need for power plants, processing and HVAC to Navy Ships.

PRECISION is dedicated to providing the finest instruments, valves and manifolds. We are the new standard. Please contact us for the finest Differential Pressure Instruments, Valves, Manifolds and related Pressure, Temperature and Flow instrumentation

We have been manufacturing industrial bimetal thermometers in Southern California since 1933. Organized as **REOTEMP** Instruments in 1965, we have been certified to ISO 9002 since 1994. We are currently ISO 9001 compliant. **REOTEMP** is recognized as a quality and service oriented company, offering not only bimetal, but also a full line of temperature and pressure products. Our offering includes vapor actuated thermometers, gas actuated thermometers, thermo wells, Sanitary Bimetals, RTD's & Thermocouples and other related temperature products. Our pressure products include a large variety of pressure gauges, diaphragm seals, transmitters, needle valves and other accessories.

The company is engaged in the manufacture and sale of [Actuation Systems for Valves and Dampers including Pneumatic Actuators, Electric Actuators, and Electro-Hydraulic Actuators as well as Manual Ball Valves and Automated Ball Valve Packages to control industrial valves.](#)
