

New Kid on the Block: **LAND**

September 2006.

Volume 1, Issue 1

P.A.S. Technologies Inc. is happy to announce...

We are happy to announce the acquisition of a new product line: **LAND Instruments**. They are specialists in the design and application of infrared measurement systems.

LAND Instruments has manufactured for over 60 years high quality thermometers and process imaging systems.

By specifying **LAND** Instruments, you get:

- Proven technical expertise and application know-how.
- Precision reliable instruments revolve through extensive research and trials in collaboration with the industry.
- Traceability to National Standards, backed by ISO 17025 and ISO 9001 Quality Management System Approval.

LAND Instruments has a list of their Certifications available on pdf format. This allows the customers to review and print out their valid certificates.

For more information about their certifications, go to:

<http://www.landinstruments.com/infrared/downloads/certificates.htm>

4500 Premier COMS (continuous opacity compliance monitor). Used for all industrial applications Features:

- Ultra-low level Measurement 0—10% Opacity
- High accuracy and repeatability +/- 0.5 opacity accuracy

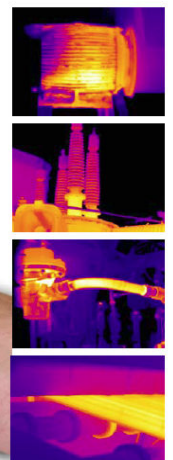

4200 Process Non-Compliance Dust and Opacity Monitor

Features:

- Direct Continuous Dust Concentration Measurement
- Small, lightweight, compact—easy to install
- High reliability, low maintenance and no moving parts.
- Measurement output is % opacity of mg/m3 dust flexible configuration.
- Wide range of output accessories—configure to meet process needs.
- Simple keypad operation - straight forward setup, calibration and diagnostics.

NEW!
THE SMALLEST
PORTABLE THERMAL
CAMERA AVAILABLE.

Introducing the new Land Guide M4 thermal imaging camera - the smallest, lightest and most advanced thermal imager in the world

LAND GUIDE M4
