1993- 2004: 11 years of Service to our Valuable Customers

By: Roxana Agelviz, Marketing Department roxana.agelviz@pasteschnologies.com

P.A.S. Technologies, Inc. started 2004 with big strength. During the month of February we received the Foxboro M& I Trailer and visited valuable customers who are constantly using these products and were eager to learn more about the new trends in Automation.

P.A.S. Technologies, Inc. created a Customer Care Department with accurate information in less time, regarding post-sale service and support. Our Team members, **Neliza Correa** and/or **Kleber Agelvis** are available for orders follow up and assistance as well as invoice information.

P.A.S. Technologies, Inc., proudly represents 30 product lines to meet your Process Control and Instrumentation needs. All of these product lines, are an important asset in our company; we have quality instruments with excellent qualifications to meet our customer's needs. Our trained Sales personnel can assist you on any of these areas with up to date information and knowledge of our instruments. They are only a phone call away. Call us at 787-752-2370 for assistance.

We have divided our Product lines into five "Sales Groups". These sales groups are: Invensys & New Technology, Fluid Handling, Automation, Process Measurement & Advanced Analytical.

01. INVENSYS & NEW TECHNOLOGY: Invensys/Foxboro, Veris, Epsilon Technologies, Markland, Mikron and EPI groups.

02. FLUID HANDLING : Spence Engineering, Inc., Leslie Controls, Jordan Controls, AT Controls, Triac Controls, Reotemp Instruments, and Precision Instruments & Valves.

03. AUTOMATION: Represented by the following lines: Pepperl & Fuchs, Eurotherm, Action Instruments, Phoenix Contact, Omnex Control Systems, Inc., Field Server Technologies, Sensaphone (Phonetics, Inc.) and Exloc.

04. PROCESS MEASUREMENT: Representing well known lines like: Ametek Process Instruments, Solartron-mobrey, Thermo Measuretech, Sierra Monitor, Agar Corporation and Druck.

05. ADVANCED ANALYTICAL: Represented by four product lines: NDC Infrared Engineering, Filter Sense, Optek, and Ametek Process Instruments.

The Key to success relays on our Team Effort! Call Us!
